**Anatomy of Foolishness** Stephen Greenspan,2019-10-04 Just days after publishing his first book on the theory of foolishness, Stephen Greenspan learned that he had been hoodwinked by Bernard Madoff's Ponzi scheme, or more accurately the Madoff "feeder" fund he invested in. Greenspan published a featured essay on the topic in the Wall Street Journal a few weeks later, and that essay was widely cited and attracted great interest for Greenspan's ideas about gullibility and in the United States and many other countries. Greenspan's new book, *The Anatomy of Foolishness*, explains why and how individuals (of all ages and levels of intelligence) and organizations act in ways that undermine their interests and even their continued existence. He examines three types of foolishness, using vivid examples to illustrate each, including the many foolish actions of US President Donald Trump. Greenspan presents a multidimensional theory of foolishness that contributes to the literature on human competence, and this book is likely to attract broad interest in the fields of psychology, sociology, economics, political science, and psychiatry as well as among those members of the general public (basically everyone) who have acted foolishly or know someone who has acted in a way that went against their own interests.

**Building Walls** Ernesto Castañeda,2019-04-15 The election of Donald Trump has called attention to the border wall and anti-Mexican discourses and policies, yet these issues are not new. *Building Walls* puts the recent calls to build a border wall along the US-Mexico border into a larger social and historical context. This book describes the building of walls, symbolic and physical, between Americans and Mexicans, as well as the consequences that these walls have in the lives of immigrants and Latin communities in the United States. The book is divided into three parts: categorical thinking, anti-immigrant speech, and immigration as an experience. The sections discuss how the idea of the nation-state itself constructs borders, how political strategy and racist ideologies reinforce the idea of irreconcilable differences between whites and Latinos, and how immigrants and their families overcome their struggles to continue living in America. They analyze historical precedents, normative frameworks, divisive discourses, and contemporary daily interactions between whites and Latin individuals. It

discusses the debates on how to name people of Latin American origin and the framing of immigrants as a threat and contrasts them to the experiences of migrants and border residents. *Building Walls* makes a theoretical contribution by showing how different dimensions work together to create durable inequalities between U.S. native whites, Latinos, and newcomers. It provides a sophisticated analysis and empirical description of racializing and exclusionary processes. *The Walls of Babylon* David Arthur,2019-08-22 *The Walls of Babylon* is a radically revisionist reading of the Revelation to John, offering startling insights into the historical roots of Gnosticism, the social dynamics of early Christianity, and the shattering impact of apocalyptic eschatology. Based on a careful analysis of the text, David Arthur argues that the motivating circumstance for Revelation was provided not by external Roman oppression but by a fierce internal dispute between gnostic and proto-orthodox factions within the early church. In the ensuing controversy, John did not side with ecclesiastical officials, as might be expected, but instead took up the cause of the persecuted outcasts. Following the precedent of the classical prophets, he speaks as a champion for the downtrodden and dispossessed--represented, for him, by the gnostic heretics. The book he has left us presents a fiery symbolic rebuke of proto-orthodox Christianity, and by extension, challenges normative religious paradigms at every level of belief and praxis.

**Defending Latina/o Immigrant Communities** Alvaro Huerta,2019-06-21 A collection of short essays and stories,

Defending Latina/o Immigrant Communities: The Xenophobic Era of Trump and Beyond focuses on one of the most vilified, demonized, and scapegoated groups in the United States: Latina/o immigrants. Using his rigorous academic training, public policy knowledge, and community activist background, as well as his personal and familial experiences as the son of Mexican immigrants, Alvaro Huerta defends and humanizes los de abajo / those on the bottom. He skillfully re-frames how Latina/o immigrants should be viewed as productive and important members in this country, debunking the xenophobic tropes, lies, and myths about Latina/o immigrants as criminals, social burdens, and national security threats. Accompanied by the brilliant art of an internationally acclaimed artist, Salomon Huerta, and powerful photos of two established photographers, this book also investigates intersectional issues related to race, class, place, and state violence.

Liquid Life Rachel Armstrong, 2019 If we lived in a liquid world, the concept of a machine would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of being alive. *Liquid Life* references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, brute materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a new materialist and liquid study of matter, Armstrong conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. *Liquid Life* seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration, including contributor Rolf Hughes' angelology of language, which explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations that help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing,

liquid life reunites us with the irreducible soul substance of living things, which will neither be simply solved, nor go away.
