Bettina Lemke

Ikigai Bettina Lemke,2024-04-24 L'ikigai è nascosto in ognuno di noi, basta trovarlo. Insieme possiamo scoprire come. Ikigai è una parola magica, così magica che non ne esiste una traduzione semplice nelle lingue occidentali. Possiamo definirlo "la ragione di esistere", "il motore della vita", o ancora meglio "ciò per cui vale la pena di alzarsi la mattina". Ognuno di noi possiede il proprio, anche se non tutti ne sono consapevoli: è la premessa fondamentale per vivere una vita sana, soddisfacente e, semplicemente, felice. Suggerendo esercizi pratici che guidano al riconoscimento dei valori e degli obiettivi veramente importanti per ciascuno nella vita, Bettina Lemke ci insegna a riconoscere cosa ci trasmette energia, curiosità, positività, realizzazione personale, fiducia in noi stessi, progettualità. In altre parole, cosa ci serve per essere felici.

Born Liquid Zygmunt Bauman,Thomas Leoncini,2018-11-26 Born Liquid is the last work by the great sociologist and social theorist Zygmunt Bauman, whose brilliant analyses of liquid modernity changed the way we think about our world today. At the time of his death, Bauman was working on this short book, a conversation with the Italian journalist Thomas Leoncini, exactly sixty years his junior. In these exchanges with Leoncini, Bauman considers, for the first time, the world of those born after the early 1980s, the individuals who were 'born liquid' and feel at home in a society of constant flux. As always, taking his cue from contemporary issues and debates, Bauman examines this world by discussing what are often regarded as its most ephemeral features. The transformation of the body - tattoos, cosmetic surgery, hipsters - aggression, bullying, the Internet, online dating, gender transitions and changing sexual preferences are all analysed with characteristic brilliance in this concise and topical book, which will be of particular interest to young people, natives of the liquid modern world, as well as to Bauman's many readers of all generations.

Lost Japan Alex Kerr, 2015-09-03 An enchanting and fascinating insight into Japanese landscape, culture, history and future. Originally written in Japanese, this passionate, vividly personal book draws on the author's experiences in Japan over thirty years. Alex Kerr brings to life the ritualized world of Kabuki, retraces his initiation into Tokyo's boardrooms during the heady Bubble Years, and tells the story of the hidden valley that became his home. But the book is not just a love letter. Haunted throughout by nostalgia for the Japan of old, Kerr's book is part paean to that great country and culture, part epitaph in the face of contemporary Japan's environmental and cultural destruction. Winner of Japan's 1994 Shincho Gakugei Literature Prize. Alex Kerr is an American writer, antiques collector and Japanologist. Lost Japan is his most famous work. He was the first foreigner to be awarded the Shincho Gakugei Literature Prize for the best work of non-fiction published in Japan.

Music and Trance Gilbert Rouget, 1985-12-15 Ritual trance has always been closely associated with music—but why, and how? Gilbert Rouget offers an extended analysis of music and trance, concluding that no universal law can explain the relations between music and trance; they vary greatly and depend on the system of meaning of their cultural context. Rouget rigorously examines a worldwide corpus of data from ethnographic literature, but he also draws on the Bible, his own fieldwork in West Africa, and the writings of Plato, Ghazzali, and Rousseau. To organize this immense store of information, he develops a typology of trance based on symbolism and external manifestations. He outlines the fundamental distinctions between trance and ecstasy, shamanism and spirit possession, and communal and emotional trance. Music is analyzed in terms of performers, practices, instruments, and associations with dance. Each kind of trance draws strength from music in different ways at different points in a ritual, Rouget concludes. In possession trance, music induces the adept to identify himself with his deity and allows him to express this identification through dance. Forcefully rejecting pseudo-science and reductionism, Rouget demystifies the so-called theory of the neurophysiological effects of drumming on trance. He concludes that music's physiological and emotional effects are inseparable from patterns of collective representations and behavior, and that music and trance are linked in as many ways as there are cultural structures.

God Is Young Pope Francis, 2018-10-02 “[A] beautiful book of hope and inspiration . . . Pope Francis speaks frankly about problems facing the young and the elderly, Catholic and non-Catholic.”—Publishers Weekly (starred review) Pope Francis examines the role of millennials in the future of the Catholic Church in this urgent call to believers of all generations to work together to build a better world. Since his election in 2013, Pope Francis has reinvigorated the Catholic Church and become one of the most popular global leaders. Now, in this extraordinary interview with journalist Thomas Leoncini, His Holiness reminds Catholics of all ages that “God is young; He is always new.” God has energy, spontaneity, and the desire for change—youthful qualities that can be rallied to fight the many problems facing the Catholic Church and the world at large. In this inspiring volume, published in English for the first time, Pope Francis’s solution to these challenges is simple: a “revolution of tenderness” that unites believers of all ages in a mission to remake the world. “God is young! God is the Eternal One who has no time, but is able to renew and rejuvenate Himself and all things continually. The most distinctive attributes of the young are also His. He is young because He makes all things new and loves innovation; because He astonishes and loves astonishment; because He dreams and wants us to dream.”—Pope Francis Praise for God Is Young “Enlightening . . . The interview is extremely wide-ranging. [Pope Francis’s] answers contemplate not only philosophy but such quotidian things as plastic surgery, pets, cell phones, consumerism, and more. The pope’s answers are generous in their length, some being even mini homilies. But all are thoughtful and thought-provoking, of interest and benefit to readers of all ages.”—Booklist (starred review)

Hokkaido Highway Blues Will Ferguson, 2003 It had never been done before. Not in 4000 years of Japanese recorded history had anyone followed the Cherry Blossom Front from one end of the country to the other. Nor had anyone hitchhiked the length of Japan. But, heady on sakura and sake, Will Ferguson bet he could do both. The resulting travelogue is one of the funniest and most illuminating books ever written about Japan. And, as Ferguson learns, it illustrates that to travel is better than to arrive.

In Praise of Walking Shane O'Mara, 2020 Walking upright on two feet is a uniquely human skill. It defines us as a species. It enabled us to walk out of Africa and to spread as far as Alaska and Australia. It freed our hands and freed our minds. We put one foot in front of the other without thinking - yet how many of us know how we do that, or appreciate the advantages it gives us? In this hymn to walking, neuroscientist Shane O'Mara invites us to marvel at the benefits it confers on our bodies and minds. In Praise of Walking celebrates this miraculous ability. Incredibly, it is a skill that has its evolutionary origins millions of years ago, under the sea. And the latest research is only now revealing how the brain and nervous system performs the mechanical magic of balancing, navigating a crowded city, or running our inner GPS system. Walking is good for our muscles and posture; it helps to protect and repair organs, and can slow or turn back the ageing of our brains. With our minds in motion we think more creatively, our mood improves and stress levels fall. Walking together to achieve a shared purpose is also a social glue that has contributed to our survival as a species. As our lives become increasingly sedentary, we risk all this. We must start walking again, whether it's up a mountain, down to the park, or simply to school and work. We, and our societies, will be better for it.

The Art of Taking Action Gregg Krech, 2014

The Scent of the Moon Selene Calloni Williams, 2016-07-18 T13:35:00+02:00 Kazimir, Svetlana and Anastasia are real characters. They live in a very remote part of the Siberian steppe. Kazimir is a white shaman with extraordinary power, a healer whose fame has reached as far as Kazakhstan, Mongolia and Moscow. Svetlana is a black shaman, able to travel through the underworld, the realm of the invisible, of ancestors, of dreams, of the soul, and take others with her, on extraordinary shamanic voyages. Anastasiya, Svetlana's niece, is one of the very few shamans in the world who masters the art of both white and black shamanism. By whoever knows her, or even just heard of her, she is considered a reincarnation of the Princess of Altay. Selene Calloni Williams and her son Michelangelo have met these three shamans by chance during one of their extraordinary research trips, while attempting to reach the burial site of the Princess of Altay. To gain the three shamans' trust, Selene and Michelangelo have visited them on several occasions since, even in winter when the steppe is

freezes at minus 40 degrees. One day, Svetlana decided to entrust them with a “tale of power”. A “tale of power” has the ability of communicating images containing new possibilities of thought and action. In this world everything is imagination and nothing which hasn’t been imagined before can happen. For example, how could the first man have hunted the first mammoth, or the first tyrannosaurus have devoured the first velociraptor, if within instinct the image of hunt hadn’t existed? In order for behaviour to exist there always must be a guiding image. These are the images which the ancients addressed as gods and which psychoanalysts define as archetypes: the original forms of all experiences. Shamans are able to converse with gods. They are bards, storytellers, they know tales able to bring images into existence, create possibilities which were previously unexplored, and thus can solve otherwise insurmountable problems. These are not just any stories; they’re “tales of power”. This book tells the story of the passionate love which bonds a boy and a girl, an old man and an old woman, tells of eagles and underworlds, describes the “shamanic journey” and the triumph of love over fear and death. It is not just any story; it shares active secrets, treasures, like magic diamonds which enter the body between one page and the other, between an adventure and the other. This book can be read at the blink of an eye, the same blink with which the great spirit of the Black Eagle, the lord of the dead, will carry you down to the underworld, to then take you back, changed forever, to your life: it’s magic, it’s poetry.

Six Pillars of Self-Esteem Nathaniel Branden, 1995-05-01 The modern classic on building self-esteem to improve your mindset, achieve more, and boost your relationships with your partner, kids, co-workers, and more—from a pioneering psychotherapist “Brilliant, laser-focused, and critically relevant, Dr. Nathaniel Branden’s ‘pillars’ give us a lifelong set of foundations upon which to build our families, our schools and our businesses.”—Dennis Waitley, Ph.D., author of *The Psychology of Winning*. *Six Pillars of Self-Esteem* is the culmination of a lifetime of clinical practice and study, hailed as the most significant work on the topic. Immense in scope and vision and filled with insight into human motivation and behavior, it is essential reading for anyone with a personal or professional interest in self-esteem. Dr. Nathaniel Branden introduces the six pillars—six action-based practices for daily living that provide the foundation for self-esteem—and explores the central importance of self-esteem in five areas: the workplace, parenting, education, psychotherapy, and the culture at large. *Six Pillars of Self-Esteem* provides concrete guidelines for teachers, parents, managers, and therapists who are responsible for developing the self-esteem of others. And it shows why—in today’s chaotic and competitive world—self-esteem is fundamental to our personal and professional power.

[Japanese Warrior Monks AD 949-1603](#) Stephen Turnbull, 2012-06-20 From the 10th to the mid-17th century, religious organisations played an important part in the social, political and military life in Japan. Known as sohei ('monk warriors') or yamabushi ('mountain warriors'), the warrior monks were anything but peaceful and meditative, and were a formidable enemy, armed with their distinctive, long-bladed naginata. The fortified cathedrals of the Ikko-ikki rivalled Samurai castles,

and withstood long sieges. This title follows the daily life, training, motivation and combat experiences of the warrior monks from their first mention in AD 949 through to their suppression by the Shogunate in the years following the Sengoku-jidai period.

Make It New Barry M. Katz, 2015-09-04 The role of design in the formation of the Silicon Valley ecosystem of innovation. California's Silicon Valley is home to the greatest concentration of designers in the world: corporate design offices at flagship technology companies and volunteers at nonprofit NGOs; global design consultancies and boutique studios; research laboratories and academic design programs. Together they form the interconnected network that is Silicon Valley. Apple products are famously "Designed in California," but, as Barry Katz shows in this first-ever, extensively illustrated history, the role of design in Silicon Valley began decades before Steve Jobs and Steve Wozniak dreamed up Apple in a garage. Offering a thoroughly original view of the subject, Katz tells how design helped transform Silicon Valley into the most powerful engine of innovation in the world. From Hewlett-Packard and Ampex in the 1950s to Google and Facebook today, design has provided the bridge between research and development, art and engineering, technical performance and human behavior. Katz traces the origins of all of the leading consultancies—including IDEO, frog, and Lunar—and shows the process by which some of the world's most influential companies came to place design at the center of their business strategies. At the same time, universities, foundations, and even governments have learned to apply "design thinking" to their missions. Drawing on unprecedented access to a vast array of primary sources and interviews with nearly every influential design leader—including Douglas Engelbart, Steve Jobs, and Don Norman—Katz reveals design to be the missing link in Silicon Valley's ecosystem of innovation.
